

ACC 282 : Taxation and Regulation

As Needed

This is a rigorous course intended for post-baccalaureate students only. It provides an accountant intending to pursue their Certified Public Accounting (CPA) license the opportunity to prepare for successful completion of the taxation and regulation (REG) portion of the licensure exam. Topics covered include federal tax procedures, business law, federal taxation of property transactions, individuals, and entities including tax return preparation, professional responsibilities, and ethics with a focus on routine and recurring tasks.

Credits 3

Prerequisites

Student must have earned a bachelor's degree from an accredited college or university.
