

PSY/SOC 202 : Introduction to Research

Fall

This course is an introduction to research in Human Services and the Behavioral Sciences. Students learn conceptual foundations of psychological research, including the nature of psychology as a science, the ethics of research, research designs, the nature of research variables, and the logic of research design and statistical analysis. Topics include empirical, qualitative, survey research, and program evaluation. Students complete the course through a demonstration of their empirical writing skills with an APA formatted research proposal.
