

# ENV 110 : Introductory Environmental Science

## *Spring*

This introductory course in environmental science takes students through the fundamental environmental health topics, such as: energy; risk assessment and management; environmental policy; air quality management; vector control; occupational safety and health; water treatment; and solid and hazardous waste disposal. It will introduce students to the profession by providing a solid working knowledge of the fundamental environmental science topics, and will serve those students who plan to pursue advanced environmental degrees including environmental science, environmental engineering or occupational health and safety, as well as those that wish to advance their career in the field of environmental health and safety.
