

GLG 103 : Introduction to Geology Lab

As Needed

This course illustrates many of the topics introduced in lecture through hands-on laboratory experiments. Experiments in laboratory include, but are not limited to: modeling Earth's spheres, rock classification, topographic map construction, and simulating earthquake hazards.

Credits 1

Prerequisite Courses

GLG 102

Notes

Class may be held outside, weather permitting, and possibly off-site depending upon time and transportation constraints.
