

HSC 123 : Operational Health Informatics

Fall, Spring

Operational Health Informatics offers the student an overview of the field of health informatics and basic computer skills by providing the fundamental concepts of health informatics and how technology is used in the delivery of health care. The course is intended to increase the knowledge and skills of the allied health worker related to the configuration, use, and maintenance of informatics interventions that will evaluate and improve health care delivery.

Credits 3

Lecture Hours 2

Lab Hours 1

Notes

Health Science students must earn a "C" or higher in all HSC courses to graduate from the program.
