Text Messaging System

PeakTXT is the College's text message notification system which is used to disseminate messages of an urgent nature including College facility closings and delays. Messages sent using this system appear on subscribers' cell phones and on the College's home page. All students are encouraged to enroll in this emergency alert program. Visit our website at www.pennhighlands.edu/PeakTXT for additional information. The College also uses texting in non-emergency situations through One-Call_now. Students are automatically registered for this service and they can opt out at any time through myPEAK.
