

BIO 212 : Human Anatomy and Physiology Lab I

Fall, Summer

This course introduces the student to the structure and function of the human body. This is a semester long introduction to Human Anatomy and Physiology Lab applications. Students will experience and apply the material learned in lecture through experimentation and application of the scientific method to the following topic areas. Course topics will include the organization of the body at the molecular, cellular, and tissue levels, focusing on the integumentary, skeletal, muscle, and nervous systems.

Credits 1

Prerequisites

BIO104/114 Principles of Biology I Lecture/Lab or TEAS Test score Academic Preparedness Level of proficient or better or high school biology within the last five years

Corequisite Courses

BIO 202
